Lego Robotics: Motor Madness

Students use the familiar medium Lego® to explore the world of robotics. This class will provide children an opportunity to learn coding using a colorful drag and drop interface while they try to bring their very own Lego® models to life.

Motor Madness class is all about cars! Calling all car lovers out there! During this 6 week session, children will build a new kind of car each week and learn the concepts surrounding it. For example one week might focus on a power car where children try different gear combinations and another week might focus on building a car with sails and learn all about wind resistance and its effect on speed. Some models will focus on programming too. IntelliBricks will provide all Lego® and touch screen computers for the camp. Children cannot take home any of their creations or Lego® products. Lego® group of companies does not sponsor, authorize or endorse any of our programs.
